SIR:

Submitted herewith is a copy of WO 97/01789 and a Form PTO-1449 listing the particulars thereof. It is requested that the Examiner return an initialed copy of the Form PTO-1449 to confirm that the WO 97/01789 has been considered and made of record.

WO 97/01789 is in the English language.

DISCUSSION

WO 97/01789 discloses switchable optical-panel 10 wherein an optically active layer made of a liquid crystal device is sandwiched between first reflective polarizer 32 and second reflective polarizer 34. The switchable optical-panel 10 is

available for switchable window 62 which is switchable between a reflecting state and a transmitting state.

WO 97/01789 also discloses transflective optical display 128 wherein the switchable transflector 136 made of the switchable optical-panel is sandwiched between liquid crystal display device 130 and backlight 132.

WO 97/01789, however, discloses that the switchable optical-panel made up of the liquid crystal device and first and second reflective polarizers is utilized as an optical device which is switchable between a transmitting function and a reflecting function. WO 97/01789 does not disclose such a liquid crystal display apparatus of the present invention, wherein a reflective polarizer device is arranged in front and rear of a liquid crystal display device to show an image etc., and wherein an optical change by application of an electric field from the front-side reflective polarizer device to the liquid crystal display device is observed as an image.
